Impact Statement: Students will now have additional courses that can be used to fulfill the foreign language requirement.

Rationale: The addition of ASIA 101 and 102 to the curriculum gives students additional options for fulfilling the foreign language requirement. As such, the courses need to be included in the list of approved courses.

Students can complete the foreign language requirement by placement or by completing a course at the appropriate level. Changing the hours from 0-6 to 0-8 is a more appropriate way to list the required hours since students can satisfy the requirement without taking any courses.
