

THE UNIVERSITY OF NORTH CAROLINA AT ASHEVILLE
FACULTY SENATE

Senate Document Number 9914S
Date of Senate Approval 5/01/14

Statement of Faculty Senate Action:

APC Document 86 **Renumber HWP 284 to HWP 295, changing prerequisite**

Effective Date: Fall 2014

1. Delete: On page 161, the entry for **HWP 284:**

284 Functional Anatomy (4)

The study of the structure and function of the human body and human muscular system as related to sports and fitness activities. Anatomical, kinesiological, biomechanical and physiologic principles related to sport and fitness activity will be examined. The laboratory portion of the course emphasizes practical applications. Prerequisite: completion of the ILS Health and Wellness requirement. Spring.

Add: On page 161, course with new number:

295 Functional Anatomy (4)

The study of the structure and function of the human body and human muscular system as related to sports and fitness activities. Anatomical, kinesiological, biomechanical and physiologic principles related to sport and fitness activity will be examined. The laboratory portion of the course emphasizes practical applications. Prerequisite: HWP 294. Spring.

Impact: No resource implications.

Rationale: The Health and Wellness department is requesting that Functional Anatomy be accepted as a lab science course for the new LAC curriculum. This will enable HWP majors to complete their lab science requirement in HWP, limiting the number of required courses for these students. The HW faculty has determined that having Physiology as a prerequisite more effectively supports learning in Functional Anatomy. Therefore, we would like to renumber HWP 284 to HWP 295 to reflect the order in which students should take the courses.
