Statement of Faculty Senate Action:

APC Document 92:   **Delete E 115, Introduction to Computing Environment**

Effective Date: Fall 2016

1. **Delete:** On page 136, the entry for **E 115**:

    115   **Introduction to Computing Environment (1)**
    Introduction to the NC State computing system, and to student-owned computing
    resources. Includes topics such as maintaining your own computer, learning about
    campus-based computing resources and applications (how to access and use them),
    ethics and professionalism in the use of computing resources, introduction to web
    development and other campus resources. (Grading: S/U). Spring.

    Impact: There will be no impact on resources and staffing of the Engineering Program due to this
    change.

    Rationale: This course originates at NCSU and has been presented as an on-line course at UNCA. The
    material presented in this 1-hr on-line course has been included in other JEM courses and is no longer
    needed.
