

THE UNIVERSITY OF NORTH CAROLINA AT ASHEVILLE
FACULTY SENATE

Senate Document Number 7318S

Date of Senate Approval 05/03/18

Statement of Faculty Senate Action:

APC Document 65 (CSCI): **Change when CSCI 412, Computer Vision, is offered**

Effective Date: Fall 2018

1. Delete: On page 113, the listing for when CSCI 412, Computer Vision, is offered:

Even years Spring.

Add: On page 113, in place of deleted entry:

Even years Fall.

Impact: This correction will clarify our offerings of data science courses, and will help students accurately plan their schedules. As indicated in the catalog, CSCI 346, Computer Graphics, is scheduled to be offered in Even years Spring, so this correction to when CSCI 412 is offered will eliminate student confusion as to when the data science courses are offered.

Rationale: This course was originally intended to be offered even years Fall as one of our data science electives. The listing of Even years Spring was a mistype in our submission of the Fall 2017 curriculum revision.
